

Financial Case Study

Rafikni Platform

Supporting Families and Children with Special Needs

Prepared for: Client / Investor

Date: July 2026

Currency: 1 USD = 250 DZD

1. Executive Summary

Rafikni is a digital platform that helps Algerian families raising children with special needs (Autism, ADHD, and speech disorders). It offers medical case management, educational courses, therapeutic articles, and a specialized store for sensory and educational games.

This case study analyzes the costs of launching and operating Rafikni. We compare two hosting providers (Hetzner and Contabo), outline domain costs via Cloudflare, and recommend Cloudflare R2 as optional storage. All prices are in USD with DZD equivalents at 1 USD = 250 DZD.

Rafikni can launch for approximately \$106 in the first year (26,500 DZD), making it an extremely affordable project with strong social impact.

2. About Rafikni

Rafikni connects three types of users:

- Patients (Families) - Parents seeking medical case management and educational resources
- Doctors (Specialists) - Professionals providing consultations and creating content
- Administrators - Platform managers overseeing operations and users

Key features include medical case management, video courses with payments, therapeutic articles, a game store (cash on delivery), and real-time notifications.

3. Infrastructure Needed

3.1. Virtual Server (VPS)

A VPS is a rented computer in a data center that runs the website 24/7. It hosts the website code, database, and user files.

3.2. Domain Name

The domain is your website address (e.g., rafikni.com). It is rented yearly. We recommend Cloudflare Registrar because they sell domains at cost with no markup.

3.3. Cloud Storage (Optional - Recommended)

Cloudflare R2 stores photos, videos, and documents. It has a generous free tier and charges nothing when users access your files, keeping costs predictable.

4. Cost Breakdown

4.1. VPS: Hetzner vs Contabo

Both are reputable European providers with data centers in Germany.

Provider - Plan	vCPU	RAM	Storage	Price/Month
Hetzner CX33	4	8 GB	80 GB	\$7.99
Hetzner CPX32	4	8 GB	160 GB	\$16.99
Contabo VPS 4	4	8 GB	75 GB	\$6.50
Contabo VPS 8	8	16 GB	150 GB	\$16.80

We recommend Hetzner CX33 at \$7.99/month (~2,000 DZD). Hetzner has been operating since 1997 and offers better network performance and support. Contabo VPS 4 is slightly cheaper (\$6.50/month) with unlimited traffic, making it a good budget alternative.

4.2. Domain - Cloudflare Registrar

Cloudflare sells domains at wholesale price with zero markup. Price stays the same every year.

Item	Cost
.com Domain (per year)	\$10.46
WHOIS Privacy	Free
DNSSEC Security	Free
DDoS Protection	Free
Annual Total	\$10.46 (~2,615 DZD)

4.3. Cloudflare R2 Storage (Optional)

R2 is unique because it charges zero fees when users access your files. Essential for a platform handling medical images and course videos.

Feature	Free Tier	Paid Tier
Storage	10 GB free	\$0.015/GB/month
Write Operations	1 million/month free	\$4.50/million
Read Operations	10 million/month free	\$0.36/million
Data Transfer (Egress)	Always Free	Always Free

The free tier is enough for the first year. Storing 50 GB of videos and images would cost about \$0.60/month (150 DZD) on top of the free tier.

5. Operating Costs

The table shows all recurring costs to run Rafikni.

Category	Monthly	Yearly	DZD/Year
VPS (Hetzner CX33)	\$7.99	\$95.88	~23,970
Domain (.com Cloudflare)	\$0.87	\$10.46	~2,615
SSL & Security	Free	Free	Free
CDN & DDoS Protection	Free	Free	Free
R2 Storage	Free (first year)	Free	Free
TOTAL	~\$8.86	~\$106.34	~26,585

KEY INSIGHT: The platform can operate for about \$8.86/month (2,215 DZD). This is less than the cost of a monthly internet subscription in Algeria.

6. Revenue Potential

Rafikni has several built-in ways to generate income:

Revenue Channel	Description	Expected Monthly
Course Fees	Paid video courses	\$50 - \$200
Case Management	Medical case fees	\$30 - \$100
Game Store	Commission on sales	\$20 - \$80
Consultations	Doctor bookings (future)	\$50 - \$150
Premium Features	Advanced reports	\$20 - \$50

With just 50-100 active families, conservative monthly revenue is \$170 - \$580 (42,500 - 145,000 DZD). Break-even is achieved with only 2-3 course enrollments or 10-15 medical case registrations per month.

7. Return on Investment

Metric	Value
First Year Operating Cost	~\$106
Estimated Yearly Revenue	\$2,040 - \$6,960
Net Profit	\$1,934 - \$6,854
ROI	1,825% - 6,466%
Monthly Break-Even	~\$9 in revenue

VERDICT: Rafikni achieves monthly break-even at just \$9 in revenue. With a projected ROI of over 1,800%, this is an extremely low-risk investment.

5-Year Outlook

- Year 1: Break-even in first month, revenue \$2,000 - \$7,000
- Year 2: Growth, revenue \$5,000 - \$12,000
- Year 3: Expansion, revenue \$12,000 - \$25,000

- Years 4-5: Scaling, revenue \$25,000 - \$50,000+

8. Risks & Mitigation

Low Risk

- Costs are fixed and predictable - no surprise fees
- Platform is already built and tested
- Free security features from Cloudflare (DDoS, SSL)

Medium Risk

- User adoption depends on marketing efforts
- Revenue requires active enrollment and sales

How to Mitigate

- Start with free courses to attract users
- Partner with Algerian special needs organizations
- Use social media targeting parent groups
- Implement a referral program

9. Recommendations

Setup for Launch

- VPS: Hetzner CX33 at \$7.99/month - best balance of cost and performance
- Domain: Cloudflare .com at \$10.46/year - wholesale pricing with free security
- Storage: Cloudflare R2 (free tier, upgrade as needed) - zero egress fees

Financial Plan

- Total first year cost: ~\$106 (26,500 DZD)
- Start with free courses to build user base
- Introduce paid features after reaching 50+ active users
- Reinvest profits into R2 storage and premium features
- Scale server only when monthly revenue exceeds \$200

Social Impact

Rafikni addresses a critical gap in Algeria: affordable support for families with special needs children. It brings medical professionals, educational resources, and community together in one digital space, reducing the burden on families who struggle to find coordinated care.

10. Currency Reference

Exchange rate: 1 USD = 250 Algerian Dinar (DZD)

USD (\$)	DZD
\$1	250 DZD
\$8.86 (monthly cost)	2,215 DZD
\$10	2,500 DZD
\$100	25,000 DZD
\$106 (first year)	26,585 DZD
